

# Herbal Bug-X

Herbal Bug-X repels all biting insects more effectively than any other natural repellent. It is even comparatively effective to the chemical types. Herbal Bug X keeps biting insects away naturally through the repellent power of edible herb and spice extracts. This blend of wild spice oils-plus is entirely safe even for babies. It's the only edible bug repellent available. Also, take the preventative type as oil under the tongue twice daily to build up your insect repellancy.

Non-toxic, Herbal Bug-X is even safe for pets.

Great for repelling ants, mosquitoes and other biting insects. One application works for up to three hours. May be used frequently. Herbal Bug-X has been tested in a plexiglass box test and proven to repel mosquitoes.

Available in:  
Topical Spray  
and  
Edible Oil
