

Chaga Dunkers™

Wild Forest Tea

Wild, Canadian & Siberian chaga with birch bark

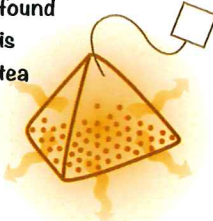

Chaga Dunkers contain rare, raw, wild chaga gently pulverized for optimal taste and nutrition. This is 100% real wild handpicked chaga—no vat-grown chaga is ever used. Pure chaga has a delicious woody, taste. Hot water releases the key nutrients and other beneficial substances. Wild chaga is the world's top source of one of the body's most powerful, versatile enzymes, Superoxide Dismutase (SOD). It's SOD that is associated with powerful effects in supporting the natural anti-aging process. Chaga is also a dense source of beta glucan, known to support immune function. In addition, it contains rare trace minerals such as germanium, lybidium, and cesium. Chaga also contains pantothenic acid, a key B vitamin for immunity and hormone function especially additional support. Melanin, a pigment needed for healthy skin, nerves, and hormone function, is yet another rare nutrient only found in wild chaga in dense amounts. Use Chaga Dunkers as your top nutritional tea—you'll feel the difference.

With Chaga Dunkers you can dunk and dunk again. Save money and enjoy all the benefits of wild chaga in organic tea bags which are safe and easy to use and reuse. Since our wild chaga is carefully cleaned, specially and uniquely prepared, then micropulverized, you gain all possible benefit from this rare, wild survival food. Large chunks commonly available from unknown sources are difficult to use and extremely wasteful of this valuable and rare, wild forest treasure. We carefully ensure that all of our rare chaga is never over-harvested or improperly handled. Conservation of this magical resource is one of our major concerns. Making it easy for you to use and enjoy for your greatest benefit are our most important concerns.

How to use Chaga Dunkers:

In a cup of hot water steep the Dunker and dunk up and down. Dunkers are reusable. Dry on saucer and reuse up to 3 times.

These reusable, pyramid-shaped tea bags provide excellent infusion efficiency, thus releasing the exotic taste and aroma found only in chaga. This pyramid-shaped tea bag is made from biodegradable fabric and is compostable.
