

Date-o-Power™

High Flavonoid, High ORAC

Date-o-Power is the only 100% natural, mountain-grown Mediterranean date concentrate available. Date-o-Power, made from handpicked dates, is a nutritious delicacy cherished throughout the world. This mountain-grown date comes from regions that are free of pesticides, chemicals, and pollution. Once it is handpicked, villagers make the concentrate by simmering the fruit into a molasses, which is essential in preserving the nutrient value of the date.

This wonderful concentrate made in the traditional way is a great addition to smoothies. The rich taste makes it ideal for baking, as well as for flavoring many dishes. In the areas where it has been natively grown for thousands of years, this date concentrate is used to celebrate the most important events, such as a child being born or important religious holidays. It is held in very high regard, not only because of its exceptional taste but also because of its rich nutritional content.

Each bottle has an ORAC value of 16,000. ORAC value indicates the antioxidant potency of foods. The greater an ORAC value is, the greater the antioxidant's ability to scavenge cell-oxidizing free radicals. Date-o-Power also has a high level of tannins, which are powerful polyphenols that are astringent by nature. Date-o-Power is also a great source of natural-source minerals and nutrients that include iron and potassium. Because these minerals are organically bound, they are more beneficial and absorbable to the body.

How to Use the Date-o-Power

- Take one tablespoon daily by itself.
- Add to shakes and smoothies.
- Use as a sweetener for baking.

ORAC value 16,000
