

A 100% Raw, Wild Extract

What a phenomenal extract this is. Herbal Zzzs is the power of wild-source melatonin and flavanols, which have the calming actions the body needs for Zzzs. Lets look at the ingredients of Herbal Zzzs to unmask its power.

Chokecherries are a potent source of wild melatonin. No wonder the bears feast on this. This explains their power to hibernate. In fact, all cherries contain melatonin. But the wild, raw cherries in Herbal Zzzs are much more potent than the farm-raised type. With age, melatonin levels fall significantly. It is difficult to build up levels, because late in life synthesis is slow. Disease also impairs synthesis, especially disorders affecting the brain and nervous system. Drugs also deplete levels. Chokecherries are one of those few plants which contain melatonin in rich amounts.

Thimbleberries are also a natural source of melatonin. Grizzlies feast on thimbleberries to gain a sedative action for their winter sleep. Both the thimbleberry and its root are extracted as key active ingredients for this formulation.

Black mulberries are also a main component. Extracts of these berries contain amino acids with melatonin-like compounds known for their potent effects. For hundreds of years black mulberries have been used for its relaxing actions. Be at ease with the power of wild Herbal Zzzs, the only Zzzs formula which is 100% wild and raw.

How to use Herbal Zzzs: Simply squirt 20 or more drops under the tongue at bedtime repeat as needed.
