

Gum and Tooth Support • Naturally Potent Spice Oils • Cinnamon & Clove Power

OregaDENT is a potent spice oil combination for cleansing all parts of the mouth. It is especially powerful for cleaning the teeth and gums. It even whitens teeth and gives a healthy appearance. OregaDENT is so potent that it also causes the destruction of plaque, and in some cases, the plaque actually falls off.

Many types of toothpaste today contain high levels of unnatural ingredients and toxic chemicals that are not safe for consumption. One of these poisons is fluoride. This poison alone is responsible for significant disease. Numerous deaths have been recorded from the accidental ingestion of fluoride, which is found widely in common toothpaste. OregaDENT is completely natural and free of all chemicals. Every ingredient in OregaDENT is nontoxic and completely edible. It contains the purest edible oils of clove bud, cinnamon, oregano P73, and wild pain root. This combination is ideal for preserving the health of gums and teeth. Both clove bud oil and wild pain root are potent analgesics, meaning they help curb pain.

OregaDENT is a tasty and ideal addition to your dental care regimen. It is the most powerful and natural way to support the health of the teeth, gums and mouth. Use daily to keep the teeth and gums healthy. Also use to fight any challenging condition in these tissues.

Directions: Apply a few drops to toothbrush, on teeth and/or gums as needed. Can be added to or used in place of regular toothpaste. Also makes a powerful and invigorating mouthwash when swished with water or salt water. When needed, OregaDENT can be used to saturate a thin roll of cotton and placed against gums.
