

# OregaFRESH™

## OregaFRESH: a new experience for the whole family

1. So effective—use OregaFresh toothpaste sparingly, only the size of a pea on the toothbrush is needed. This is enough to clean and brighten teeth and help them to be free of cavities. This small amount will clean and freshen the mouth and breath.
2. No more waste. Now you can control the amount of toothpaste used with superior German engineering. Even the little tykes will love using this special toothpaste and dispenser.
3. The tube and top are made in the USA. No kidding. Then the piston that regulates the flow is high tech German engineering. So, it works every time. (If left open for an extended time and toothpaste allowed to dry on the dispenser opening, simply soak in warm water, wipe off the toothpaste and continue to enjoy this remarkable product.)
4. You get every drop of toothpaste out with this system, unlike tubes and other devices commonly used.

### Why is OregaFRESH so special?

First of all, let's look at what it does not contain. There are no toxic chemicals of any kind. That includes fluoride, a dangerous substance for everyone, especially children. It's also nice and foamy without the hazardous sodium lauryl sulfate. It's free of coloring agents, extenders, expanders, emulsifiers, and cheap chemicals which are used to make ineffective products. How scary is it to know that every molecule must be spit out to be safe. This is especially dangerous for little ones whose bodies are already exposed to far too many toxic substances. Why not just use totally powerful and completely safe ingredients from nature from the beginning? The list of ingredients of most toothpastes today read like a chemical compendium. Only fine quality natural material is truly safe and, yet, equally or even more effective. That's what OregaFresh is all about.

Everyone should do everything humanly possible to keep gums, teeth, and the mouth healthy. Properly chewing healthy food is a major contributor to brilliant health. Thus, the mouth is where ideal digestion begins. Teeth were meant to last for a lifetime. The OregaFresh system is designed to protect the entire family from tooth decay, bad breath, stained teeth and that fuzzy, nasty feeling on the teeth and tongue when bacteria leaves it's filth behind. It's even for those who have lost teeth, since the system will help keep the mouth and tongue fresh and clean.

### Fine, pure ingredients: the OregaFRESH difference

This is so important, especially for personal care items. OregaFresh should be used daily at least twice a day. It contains the finest combination of natural ingredients which help teeth stay white without harsh chemicals. While common ingredients such as glycerin are used in natural toothpaste, it has been found to weaken gum tissue, and, thus, bleeding gums may result. OregaFresh omits this substance and all GMO ingredients to include sweeteners and emulsifiers. Remember, OregaFresh helps give you a healthy mouth and a beautiful smile to light up the world.
