

OregaMax™

Highly digestible • 100% raw

OregaMax is the original wild oregano supplement. When you ingest the wild, high-mountain oregano found in OregaMax, you are consuming the same ancient substance known as the hyssop of the Bible. OregaMax is made from wild oregano found in the remote Mediterranean mountains. It is a top source of natural calcium, zinc, copper, and phosphorous. It is also an outstanding source of vitamin K. The plant grows out of a white, rocky, mineral-rich soil and is the ideal tonic for anyone desiring strong herbal support. OregaMax is a village formula that has been used for thousands of years. The wild oregano in OregaMax provides a rich array of highly desirable flavonoids.

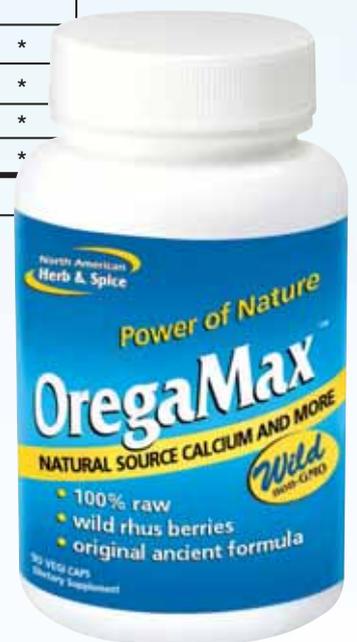

OregaMax also contains Rhus coriaria, a mountain berry containing a wealthy assortment of desirable antioxidant activity. Rhus is rich in anthocyanins and water soluble tannins. The anthocyanins contain the following flavonoids: malic, tannic, and gallic acids. Rhus also provides naturally occurring vitamin C.

Organic garlic and onion are added to accelerate the herbal powers. Onions, like garlic, are members of the allium family, and both are loaded with powerful sulfur-containing compounds which are responsible for their pungent odors and many of their unique effects. Onions contain a significant amount of vitamin C and numerous flavonoids, most notably quercetin, and are very rich in chromium. Marginal chromium deficiency is common in the United States. Onions were so highly regarded by the Egyptians that they were used as currency to pay the workers who built the pyramids. They were also placed in the tombs of kings, such as Tutankhamen.

Garlic is rich in a variety of powerful sulfur-containing compounds, including thiosulfates and sulfoxides. In addition, garlic is an excellent source of selenium.

Try our plant-based array of organically bound minerals, bioflavonoids, and vitamins in OregaMax. Plant-based sources of minerals are growing in status for the highly informed users of supplements. While most people take two or more capsules daily, you can empty the capsules right onto your food. It's so flavorful that two or three capsules sprinkled over any meal create an exotic treat. This product is a source of highly concentrated, wild-crafted, plant-based organic nutrients.
