

## Potent antimicrobial spray and air detoxifier

- Antiseptic • Antioxidant • Decontaminant • Bug repellent

OregaSpray is the ideal disinfectant spray for the air and surfaces. This is a combination of potent spice oils, emulsified in a water soluble base. Try this 100%-natural cleansing spray. It is made from steam-extracted oils of wild oregano, bay leaf, and lavender and is chemical free. This makes it ideal for people with sensitivities and allergies. Avoid other sprays and cleaning aids which have neurotoxins, endocrine disrupters, and also carcinogenic chemicals.

OregaSpray is all natural and so safe that it can be eaten. Therefore it is the ideal insect spray to apply directly to the skin, even on babies and pets. Great for traveling, the uses are vast and a bottle goes a long way. Use it in the kitchen as an antimicrobial spray to disinfect countertops, dishes, and even food. In the bathroom, it destroys mold. Just spray on shower walls, and wipe clean. It is also useful for repelling garden pests.

The central spice in this formulation is Oreganol P-73. This is a synergistic blend of several oregano plants in a precise, scientifically formulated creation. The cleansing power of Oreganol P-73 has achieved legendary status in the organic herbal community.

Lavender makes an ideal skin tonic due to its long history of use in treating skin conditions. The scientific name for lavender comes from the Latin word *lavare*, "to wash." The historical naming of this spice shows us that, from the beginning, the ancients found value in cleaning with this spice.

Bay leaf is historically used to keep moths away, due to the leaf's lauric acid content, which gives it insecticidal properties.

Tests at Celsus Labs prove that this spray kills a wide range of bacteria, viruses, and molds, both in the air and on surfaces. Georgetown University tests show that it even kills foot and toenail fungus. Use it to cleanse both germs and odors.

available in 2 and 4 ounce size
