

Oreganol P73 Cream

High emollient • Well tolerated

North American Herb & Spice, makers of Oreganol P73, has combined the benefits of wild oil of oregano with other powerful essential oils to produce Oreganol P73 Cream. Oreganol P73 Cream is a potent formula that is designed for various applications such as cuts, bug bites, dry/chapped skin and sunburn. Oreganol P73 Cream is also a tremendous moisturizer and is excellent for maintaining healthy skin.

Wild oil of oregano P73 and bee propolis are proven to contain some of the most powerful antioxidants on earth. These properties, combined with the ancient beautification and rejuvenation capabilities of wild oil of lavender, wild St. John's wort extract and wild oil of myrtle, create a cream that is not only effective but pleasant to the skin. Oreganol P73 Cream is extremely absorbable when applied and is essential for healthy, beautiful skin. The Canadian wildflower honey added to the cream increases its effectiveness as a healing agent. After all, honey is known to offer a wide range of desirable qualities. The honey, combined with extra virgin olive oil, also provides Oreganol P73 Cream with a rich and soothing feeling when applied to the skin.

This exotic formula is perfect for those who want a natural and chemical-free alternative to commercial skin creams. Oreganol P73 Cream is so safe and natural that you can even eat it. Many commercial skin creams contain a variety of harsh chemicals that can be absorbed into the body, which is why it is so important to avoid putting anything on your skin that you would not eat.

Directions: Oreganol P73 Cream is safe to use daily. Apply topically. Repeat as necessary. It is ideal for skin conditions of all types. Avoid contact with eyes.
