

Purely-E™

High antioxidant

Did you know that the majority of vitamin E sold today comes from genetically modified soy? Introducing Purely-E, a soy-free, corn-free, non-GMO and 100% food-sourced vitamin E. We searched remote areas of the world to bring you a truly natural product sourced from sunflower seeds, pumpkin seeds, African red palm oil, and wild rosemary. These are all sources of naturally occurring mixed tocopherols and tocotrienols and, when blended together, provide the complete makeup of vitamin E.

Vitamin E actually has eight components: alpha, beta, gamma, and delta tocopherol, and alpha, beta, gamma, and delta tocotrienol. All eight types of vitamin E have a significant amount of structural similarity, which results in all having antioxidant properties. Current studies performed at Ohio State University indicate that certain members of this vitamin E complex possess distinctive biological functions not shared by the others. Fortunately, Purely-E provides a complete blend of tocopherols and tocotrienols. All important forms of vitamin E are not usually found in vitamin E supplements, which is why Purely-E is so crucial for anyone looking for a complete source of vitamin E.

Along with vitamin E, the African red palm oil provides naturally occurring vitamin A. When derived from colorful plant sources, vitamin A is in the form of powerful antioxidants called provitamin A carotenoids. Alpha-carotene, beta-carotene, lycopene, and lutein are all provitamin A carotenoids, and they all have unique functions.

This wonderful mixture is truly unique, because of our complete dedication to a truly natural and unaltered source of vitamins. Don't settle for anything less. We didn't.

Purely-E is available in oil and fish capsule forms.

Directions: Take under the tongue or in juice/water once daily. Also may be used topically for healthy skin or on wounds.
