

Sooth-eez™

Wild remote-source cherry & spice throat spray

High wild flavonoid • Enzyme-charged • High soothing power

Sooth-eez is potent. This wild, raw formula is for spraying on the back of the throat. It can also be sprayed in the rest of the mouth. Also, it can be sprayed on wounds. It is a powerful combination of wild (rare) raw pin cherry extract, wild P73 Oreganol, wild oil of sage, wild, raw enzyme-rich honey, and cinnamon bark oil. Wild pin cherry and its bark have been used for thousands of years in natural medicine. Sage has also been used since ancient times for its soothing effects, as well as honey, which has been the subject of many clinical trials. Also, because the ingredients are raw, the enzymes are active, which explains Sooth-eez's potency.

Sooth-eez is the true and raw power of nature in a spray bottle. Such a powerful combination of wild, remote pin cherry extract plus spice oils can't be exceeded. It is extremely difficult to find these wild cherries, so Sooth-eez is in limited supply. The raw honey used in Sooth-eez is from the remote Canadian wilderness. It's all to soothe the throat, tongue, palate, and even the gums and teeth. Even though it is powerful, it has a pleasant taste. This is truly a multi-use throat spray. Use it as often as desired. Great for children.

How to use Sooth-eez: Simply mist Sooth-eez against the back of the throat as often as desired. Also, mist on the roof of the mouth. It may be sprayed on gums and teeth, as needed. Use in all age groups. There is nothing more soothing and natural available. That's why it is called Sooth-eez. Nothing else could be so rare and powerful.

The list of ingredients is impressive and demonstrates the true powers of this formula:

- extract of wild cherry bark
- extract of raw, wild, remote-source pin cherries
- raw, wild, remote-source honey
- wild oil of Oreganol P73
- wild oil of sage
- cinnamon bark oil

2 FL. OZ. (60 M.L.)
