Wild-Source Cannabis Extract™
Hempanol-CF™
SUPER STRENGTH

Supports a healthy nervous system plus calm & focus*

“Hemp 3000” is a powerful, supercritical, certified wild-source, organic cannabis extract—full cannabis profile, including rare, powerful terpenes, 3000 mg per bottle

Hempanol-CF Super Strength is the cannabis extract-based “be calm and focused” formula for overall health support.* It’s the only whole food, full spectrum raw cannabis extract available, a supercritical CO₂ extract. Nothing is added, and nothing is taken away. This is the exclusive, original, organic-source, supercritical hemp/cannabis extract. It is derived from hemp plants grown only for NAHS on certified organic soil and therefore is not the type that is extracted industrially through solvents. Since it is a wild-source extract it is potent, with 15% cannabidiol content per extraction.

Solvents typically used in material made into supplements include acetone, butane, which is lighter fluid, hexane, and alcohol. The solvents, including the petrochemical ones, are driven off by heat; however, in many cases significant residues remain. Furthermore, these solvents can never be totally removed. Regardless, who would knowingly consume herbal or plant extracts treated with noxious solvents, the latter being categorical carcinogens? With Hempanol-CF Super Strength, no such solvents are ever used, and it is extracted only through supercritical CO₂, which is entirely a cold process. This means that only Hempanol-CF Super Strength is raw. Thus, all the key nutrients, including the enzymes, are intact.

Most cannabis extracts are processed with heat, which can be as high as 250 degrees. Both heat and solvents damage the delicate compounds in cannabis, including the terpenes and cannabinoids. Since

Hempanol-CF Super Strength is free of all such noxious chemicals and not heat treated, the natural substances contained in this formula are fully intact, including the highly sophisticated and exceedingly potent terpenes. This means that these molecules are far more biologically active than those found in heat- and solvent-treated types.

This is the original, raw, crude, unprocessed cannabis extract from organic hemp stalks. Accept no cheap imitations made from heat-extracted and/or solvent-corrupted hemp. Hempanol-CF Super Strength is exclusively organic cannabis extract without any other ingredients in an extra virgin olive oil and hemp seed oil base. It’s easy and beneficial to use every day. The whole family can feel confident that Hempanol-CF Super Strength is a blessing in a bottle.
